TRIGEYSER™

The three heavily aerated, conical displays of the TriGeyser series create an impressive pyramid of water. The height proportions can be varied by the adjustment of valves regulating each pod, allowing on site modifications.

Powered by a U.L. listed heavy-duty submersible turbine pump, the TriPod standard equipment includes a complete U.L. listed control panel.

All fountain components are fully waterproof and made of the finest corrosion resistant materials to provide years of dependability and high performance.
